

Next-Level Security: Advanced Monitoring and Integration for DIFM Security Companies

As Do It For Me (DIFM) security companies strive to provide scalable, state-of-the-art solutions, they require advanced monitoring features that reduce false alarms and maximize system performance. Origin AI's Home Monitoring solution meets these demands with its innovative WiFi Sensing technology, accurately detecting human motion patterns and filtering out non-human motion. It can be seamlessly integrated into DIFM security companies' new and existing hardware, providing an enhanced, scalable, and reliable security system that delivers advanced monitoring capabilities and superior customer experience.

Scalability and Professional Installation

Origin AI's Home Monitoring offers multiple options for integrating into existing security systems, providing DIFM security companies with a scalable and reliable security system that caters to a wide range of customers. The system's flexibility in enabling advanced monitoring features allows

Features

- Scalable solution
- Advanced monitoring features
- Compatibility

Benefits

- Customized security solutions
- Reduced false alarms
- Enhanced market position

DIFM companies to offer professionally installed and monitored services that meet diverse customer needs, from residential homes to small businesses. This versatility allows DIFM providers to expand their market reach and adapt to changing customer demands more easily.

Advanced Monitoring Features

With its innovative WiFi Sensing technology, the Home Monitoring solution delivers advanced intruder detection capabilities, such as non-line of sight sensing and high human detection accuracy. These features enable DIFM security companies to provide an enhanced security experience that reduces false alarms, improves overall system effectiveness, and offers added value to customers. By incorporating Origin AI's Home Monitoring solution, DIFM companies can position themselves as leaders in the industry, offering cutting-edge security solutions that set them apart from their competitors.

Improved Market Position and Customer Loyalty

By offering a cutting-edge, scalable, and professionally installed security solution, DIFM security companies can strengthen their market position and foster long-term customer loyalty. The enhanced security experience

provided by Origin AI's Home Monitoring solution helps DIFM companies differentiate themselves from competitors and retain customers on their platform longer. In addition, the system's advanced features and flexible integration enable DIFM providers to craft value-added service bundles either with or without new hardware, further enhancing their ability to deliver optimized offers for each of their target segments.

In conclusion, Origin AI's Home Monitoring solution provides DIFM security companies with a powerful and scalable security system that flexibly integrates into existing systems and offers advanced monitoring features. By incorporating innovative WiFi Sensing capabilities, DIFM security providers can differentiate themselves from competitors, improve their market position, and foster long-term customer loyalty. Origin AI's Home Monitoring solution enables DIFM companies to meet the diverse needs of their clients, from residential homes to small businesses, while delivering a cutting-edge security experience that drives customer satisfaction and business success.

About Origin AI

Origin AI revolutionizes WiFi usage by transforming signals into WiFi Sensing technology. Harnessing AI, we analyze signal disruptions caused by daily activities to provide valuable insights for ISP, security, and IoT applications. Key features include Motion, Presence, Falls, and Breathing AI engines, each offering industry-leading accuracy. Our competitive advantages include non-line of sight sensing, high accuracy, elimination of wearable devices, and simple plug-and-play deployment. Origin WiFi Sensing runs 100% on the edge, ensuring superior security through end-to-end encryption and efficient software requiring minimal CPU resources. Easily embeddable into most WiFi devices, our solution adheres to industry-leading security protocols. Experience the transformative power of Origin AI and enhance your business with smart, secure WiFi Sensing solutions. WiFi can do more.
